- 08 Auditing and anti-tampering

## ISP/MSP READY

- 01 Natively multi-tenant
- 02 A complete API enables full integration with any environment

## WHY DO YOU NEED AN EMAIL ARCHIVER?

There are many reasons why companies should think about implementing email archiving:

- Protects you against legal risks where you need to refer to an email which may have been deleted from an employee's mailbox; an email archiver is a secure storage data repository that provides organizations with protection and support during legal proceedings, making it easy to access and find the required documentation (e-Discovery)
- Boosts employee productivity by making it quicker and easier to search for and find emails
- Enhances mail server performances and storage needs are optimised
- Makes data available and accessible in the event of any downtime, planned or unplanned so that the risk of data loss is minimized
